Background / Cefndir

Healthy Child Wales Programme (Welsh Government, 2016)

To assist children..

‘to meet all ... developmental milestones enabling them to achieve school readiness’

and

‘to ensure early detection of ...developmental ...problems through an appropriate, universal screening programme’

Background / Cefndir

Rhaglen Plant lach Cymru (Llywodraeth Cymru, 2016)

I helpu plant..

‘cyrriaedd pob ... carreg filltir ddatblygiadol gan eu galluogi i fod yn barod ar gyfer yr ysgol’

a

‘sicrhau bod problemau datblygol yn cael eu canfod yn gynnar drwy raglen sgrinio gyffredinol briodol’

Caerdydd

Background / Cefndir

Objectives of the review / Amcanion yr adolygiad

1. Review current evidence regarding advantages and disadvantages of screening.
- Should screening take place at all?
- What should be screened, by whom and when?
1. Adolygu'r dystiolaeth gyfredol ynghylch manteision ac anfanteision sgrinio.
 - A ddylai sgrinio ddigwydd o gwbl?
 - Beth ddylai gael ei sgrinio, gan bwy a phryd?

Objectives of the review / Amcanion yr adolygiad

2. Assess, critique and summarise the English and Welsh language screening/identification tools currently available to assess children's language ability and progress.

2. Asesu, gwerthuso a chrynhoi'r offerynnau sgrinio/adnabod Cymraeg a Saesneg sydd ar gael ar hyn o bryd i asesu gallu a chynnydd iaith plant.

Objectives of the review / Amcanion yr adolygiad

3. Assess, critique and summarise what makes an effective screening/identification tool.

Factors including validity, reliability, specificity and bi/multilingualism to be considered.

3. Asesu, gwerthuso a chrynhoi'r hyn sy'n gwneud offeryn sgrinio/adnabod effeithiol.

Ffatorau gan gynnwys diliysrwydd, dibynadwyedd, penodoldeb a dwy/amlieithrwydd i'w hystyried.

Overview / Trosolwg

- Brief methodology
- Should screening take place?
- What are the important components for an English and Welsh All Wales early language screening/identification tool?

BREAK – 10.45 - 11.00

- What makes an effective surveillance tool?
- Which surveillance tools should be used?
- Conclusions and recommendations

- Methodoleg gryno
- A ddylai sgrinio ddigwydd?
- Beth yw'r elfennau pwysig ar gyfer offeryn sgrinio/adnabod iaith gynnar Cymraeg a Saesneg Cymru Gyfan?
- EGWYL – 10.45 - 11.00
- Beth sy'n gwneud offeryn gwyliadwriaeth effeithiol?
- Pa offerynnau gwyliadwriaeth y dylid eu defnyddio?
- Casgliadau ac argymhellion

Bristol Speech and

Brief methodology / Methodoleg byr

Sam Harding,
BSLTRU

Methodology / Methodoleg

Three scoping reviews

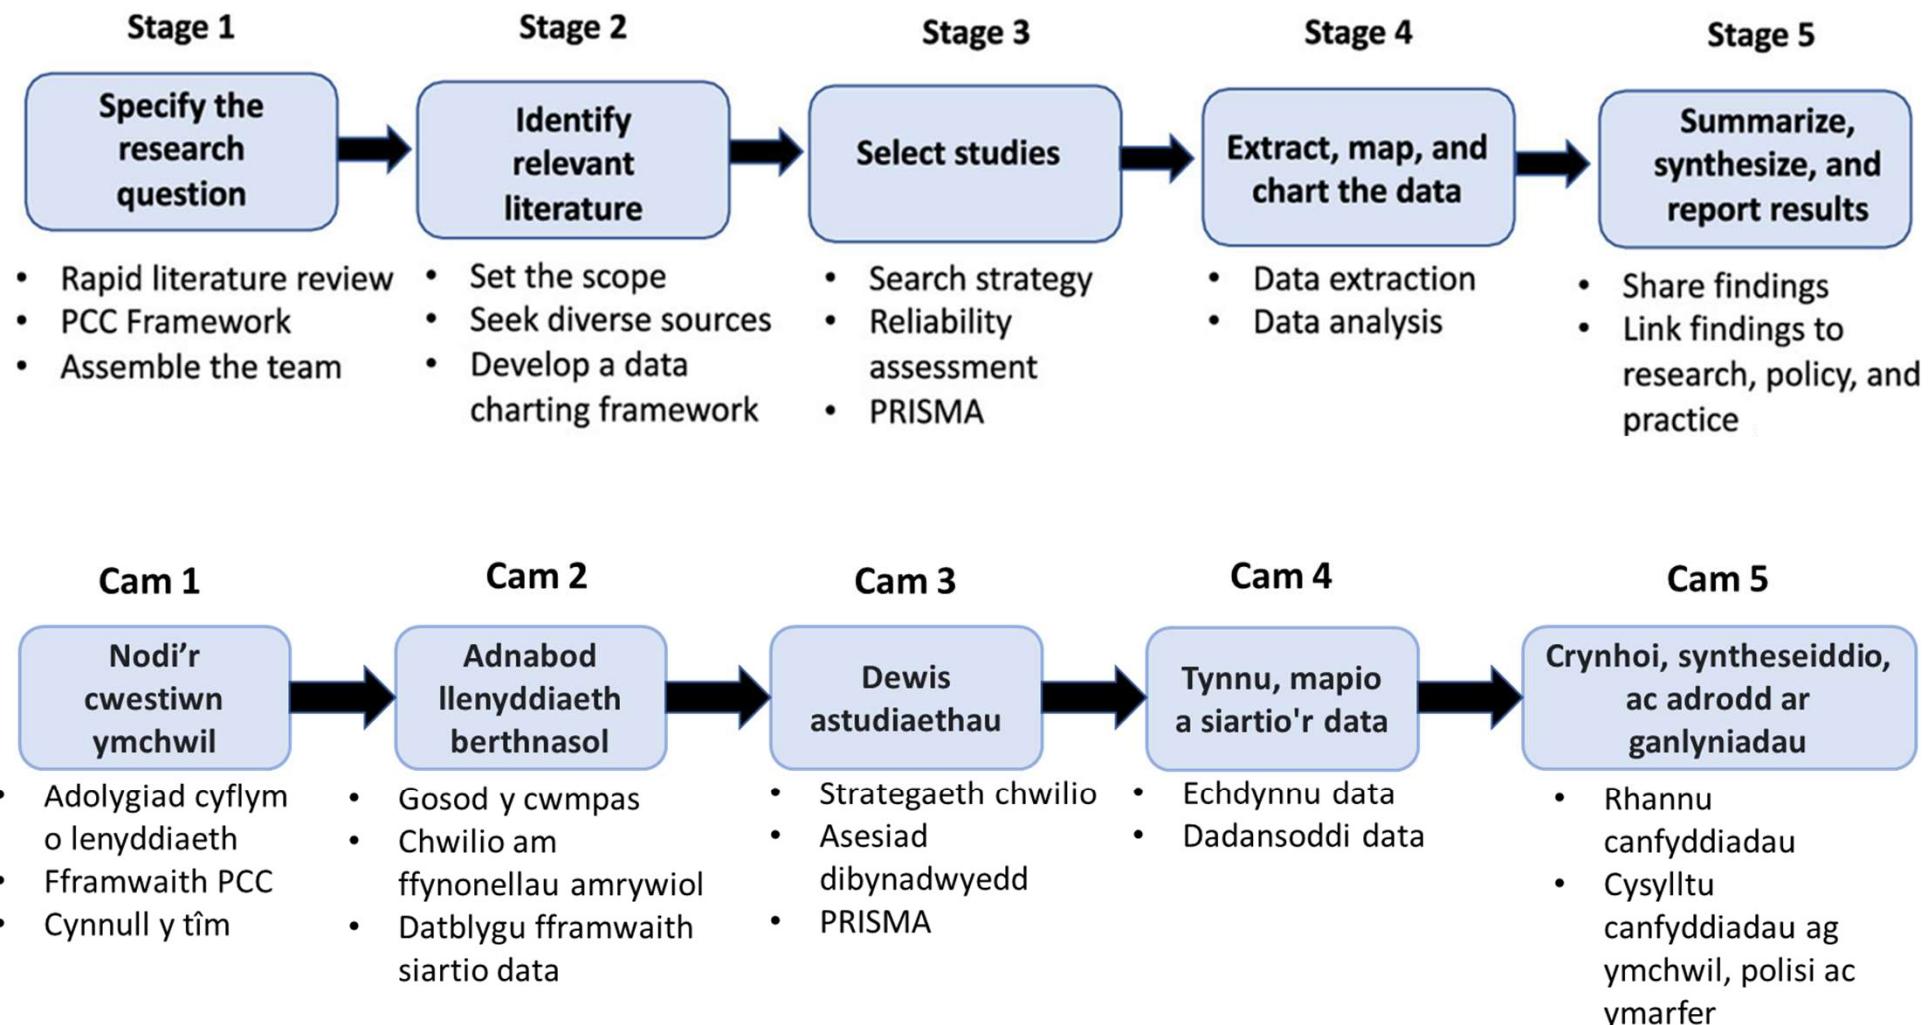

- Systematic reviews answer questions like:
 - What works for who and in what situations?
- Scoping reviews aim to ‘explore’ questions like:
 - What early language screen is suitable for children in Wales from birth to 5 years?

Tri adolygiad cwmpasu

- Mae adolygiadau systematig yn ateb cwestiynau fel:
 - Beth sy'n gweithio i bwy ac ym mha sefyllfaoedd?
- Nod adolygiadau cwmpasu yw ‘archwilio’ cwestiynau fel:
 - Pa sgrin iaith gynnar sy'n addas ar gyfer plant yng Nghymru o enedigaeth hyd at 5 oed?

Scoping review process / Proses adolygiad cwmpasu

Inclusion criteria / Meini prawf cynhwysiant

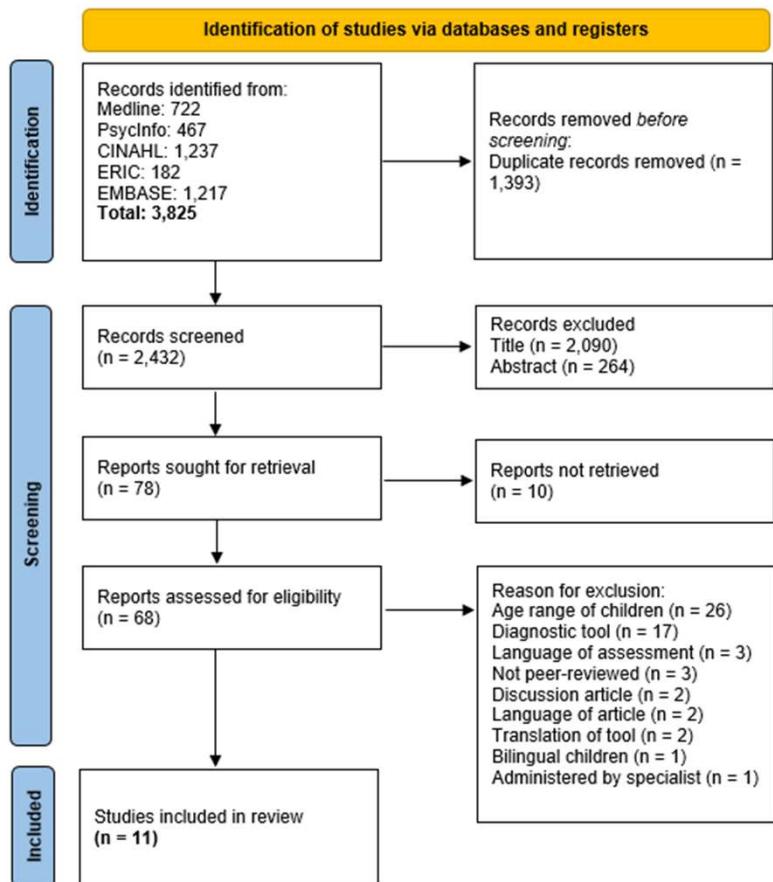

- Children's age range 0 to 4;11
- Sample size larger than 20
- Sample drawn from one of:
 - General population
 - Clinical population of children with speech and language difficulties
 - Mixed clinical/general population
- Study design was description/validation of a test designed for identification of speech and/or language delay or difficulties
- Test designed to be used in either:
 - Primary care health setting
 - Early Childhood Education and Care setting by non-specialist staff for early identification
- Ystod oedran plant 0 i 4;11
- Maint sampl yn fwy nag 20
- Sampl wedi'i dynnu o un o'r canlynol:
 - Poblogaeth gyffredinol
 - Poblogaeth glinigol o blant ag anawsterau lleferydd ac iaith
 - Poblogaeth gymysg glinigol/gyffredinol
- Cynllun yr astudiaeth oedd disgrifiad/dilysu prawf a ddyluniwyd i adnabod oediau neu anawsterau lleferydd a/neu iaith
- Prawf wedi'i gynllunio i'w ddefnyddio yn y naill neu'r llall:
 - Cyd-destun iechyd gofal sylfaenol
 - Cyd-destun Addysg a Gofal Plentyndod Cynnar gan staff nad ydynt yn arbenigwyr er mwyn adnabod cynnar

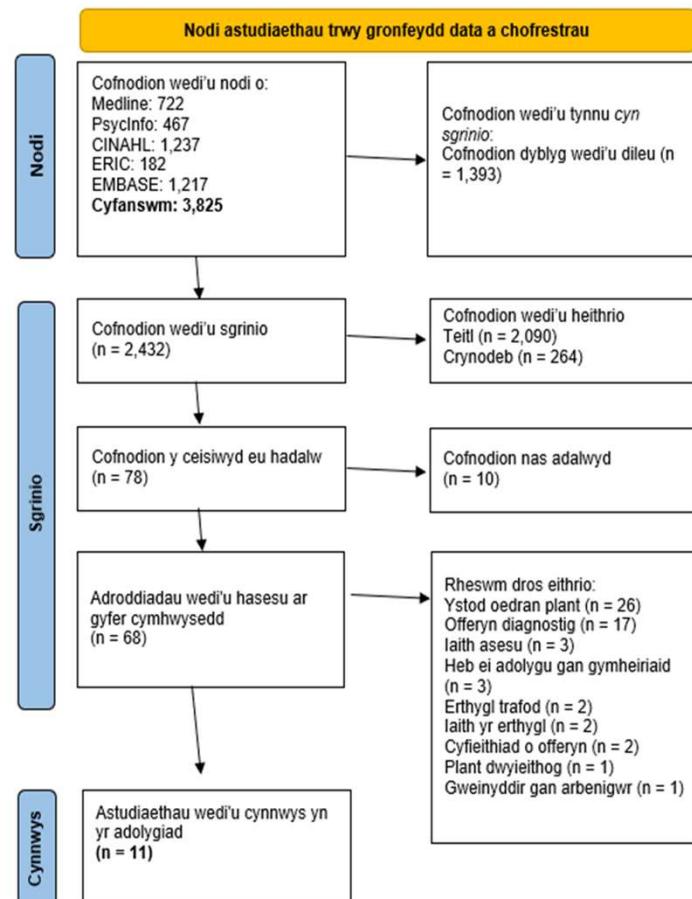

PRISMA-ScR Flowchart / Siart Llif PRISMA-ScR

English Language screening review = 11 retained papers

**Adolygiad sgrinio laith Saesneg =
11 papur wedi'u cadw**

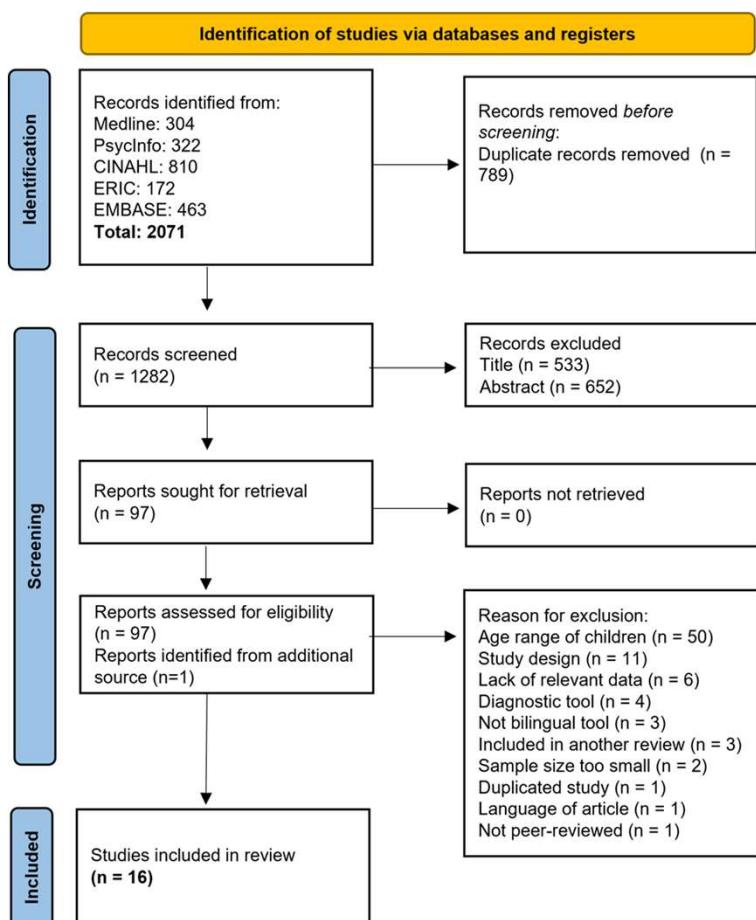

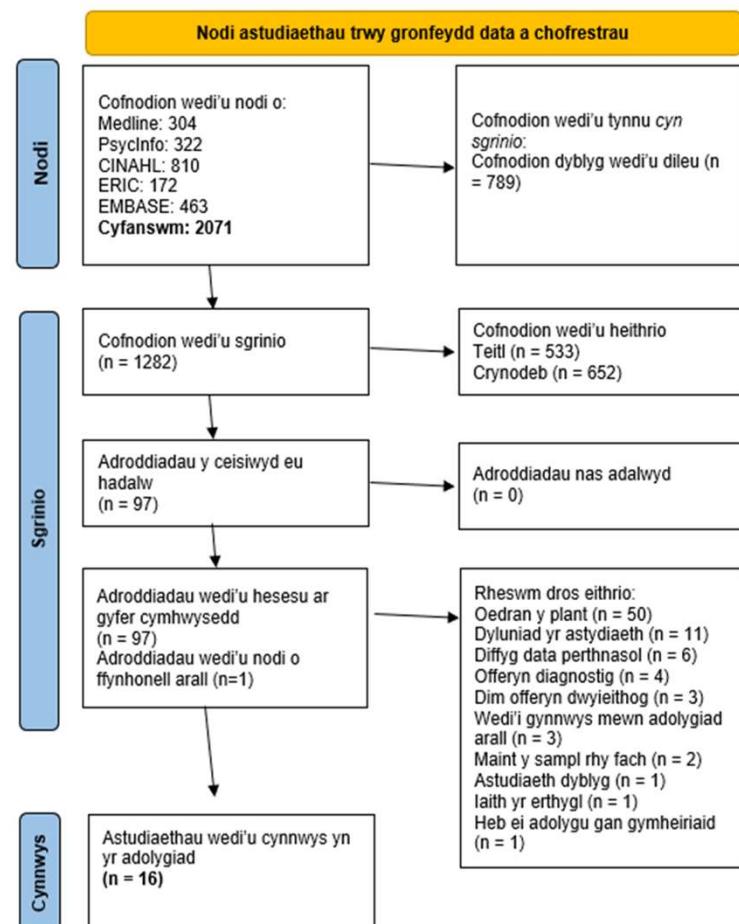

PRISMA-ScR Flowchart / Siart Llif PRISMA-ScR

Should we screen for Speech Language and Communication Needs? /

A ddylem ni sgrinio ar gyfer
anghenion lleferydd, iaith a
chyfathrebu?

Sharon Baker,
BSLSTRU

What do we mean by screening?/ Beth ydyn ni'n ei olygu trwy sgrinio?

"Using standardized tools to detect the risk of a delay, which can be corroborated by a full-scale diagnostic evaluation" (Berkman et al., 2015)

"Defnyddio offer safonnol i ganfod y risg o oediad, y gellir ei ategu gan werthuso diagnostig ar raddfa lawn" (Berkman et al., 2015)

Advantages & Disadvantages of Screening / Manteision & Anfanteision Sgrinio

- The condition should be an important health problem
- The natural history of the condition should be known
- The condition should have a recognisable pre-symptomatic stage
- There should be an effective and acceptable form of treatment at the pre-symptomatic stage
- Dylai'r cyflwr fod yn broblem iechyd bwysig
- Dylid gwybod hanes naturiol y cyflwr
- Dylai'r cyflwr gael cyfnod cyn-symptomatig y gellir ei adnabod
- Dylai fod math effeithiol a derbynol o driniaeth yn y cyfnod cyn symptomatig

Advantages & Disadvantages of Screening / Manteision & Anfanteision Sgrinio

- There should be an agreed policy of whom to treat
- There should be facilities for diagnosis and evaluation
- There should be a screening test available
- Dylai fod polisi cytûn ynghylch pwy i'w drin
- Dylai fod cyfleusterau ar gyfer diagnosis a gwerthusiad
- Dylai fod prawf sgrinio ar gael

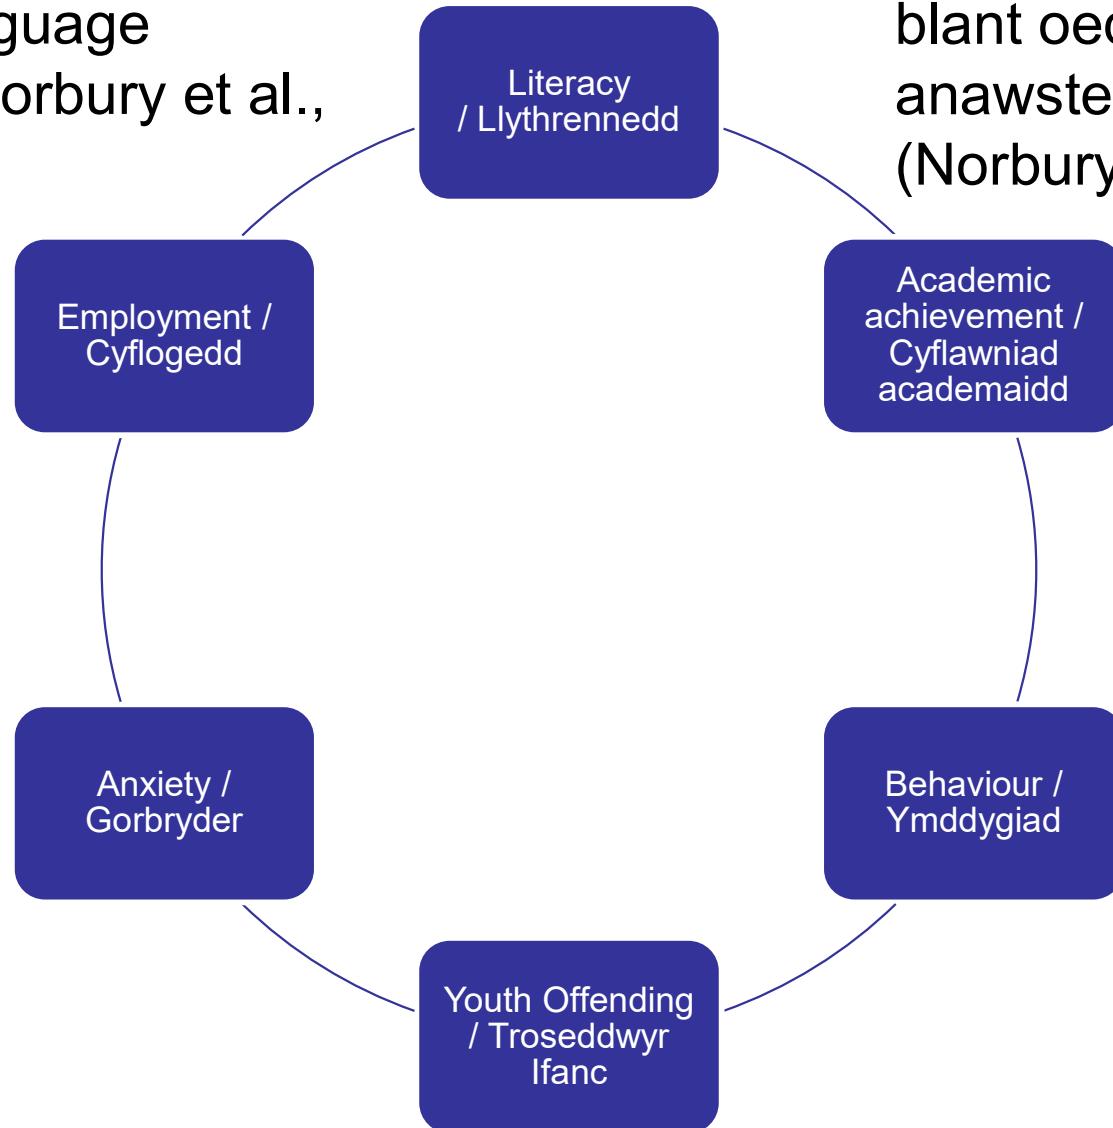

World Health Organisation
(1968)

Sefydliad Iechyd y Byd
(1968)

The condition should be an important health problem / Dylai'r cyflwr fod yn broblem iechyd pwysig

Almost 10% of children aged 4-5 have language difficulties (Norbury et al., 2016)

Mae gan bron i 10% o blant oed 4-5 anawsterau iaith (Norbury et al., 2016)

Advantages & Disadvantages of Screening/ Manteision & Anfanteisi on Sgrinio

- The condition should be an important health problem
- The natural history of the condition should be known
- The condition should have a recognisable pre-symptomatic stage
- Dylai'r cyflwr fod yn problem iechyd bwysig
- Dylid gwybod hanes naturiol y cyflwr
- Dylai'r cyflwr gael cyfnod cyn-symptomatig y gellir ei adnabod

Advantages & Disadvantages of Screening/ Manteision & Anfanteision Sgrinio

- The condition should have a recognisable pre-symptomatic stage
- There should be an acceptable and effective form of treatment at the pre-symptomatic stage
- Dylai'r cyflwr gael cyfnod cyn-symptomatig y gellir ei a dnabod
- Dylai fod math effeithiol a derbynol o driniaeth yn y cyfnod cyn symptomatig

There should be an agreed policy of whom to treat

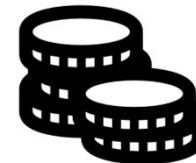

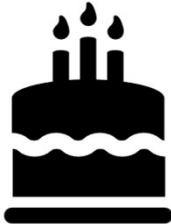

- Physiological Factors
- Home & Environmental Factors
- Type of Speech, Language and/or Communication Difficulty

- Ffatorau Ffisiolegol
- Ffatorau Cartref & Amgylcheddol
- Math o Anhawster Lleferydd, Iaith a/neu Gyfathrebu

Risk & Protective Factors/ Risg & Ffatorau Amddiffynnol

Advantages and Disadvantages of Screening

- There should be facilities for investigation and diagnosis
- There should be a screening test available
- Dylai fod cyfleusterau ar gyfer archwiliad a diagnosis
- Dylai fod prawf sgrinio ar gael

What are the important components for an English and Welsh All Wales early language screening/ identification tool? /

Beth yw'r cydrannau pwysig ar gyfer
offeryn sgrinio/adnabod iaith gynnar
Cymru Gyfan Cymraeg a Saesneg?

Rhonwen Lewis,
CMU

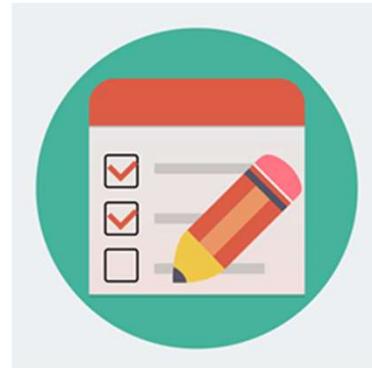

Protocols for screening early language development / Protocolau sgrinio datblygiad iaith gynnar

What?

- Risk and protective factors
- Particular skills - identification of potential ongoing concerns
- Typical development is used as a guide

Beth?

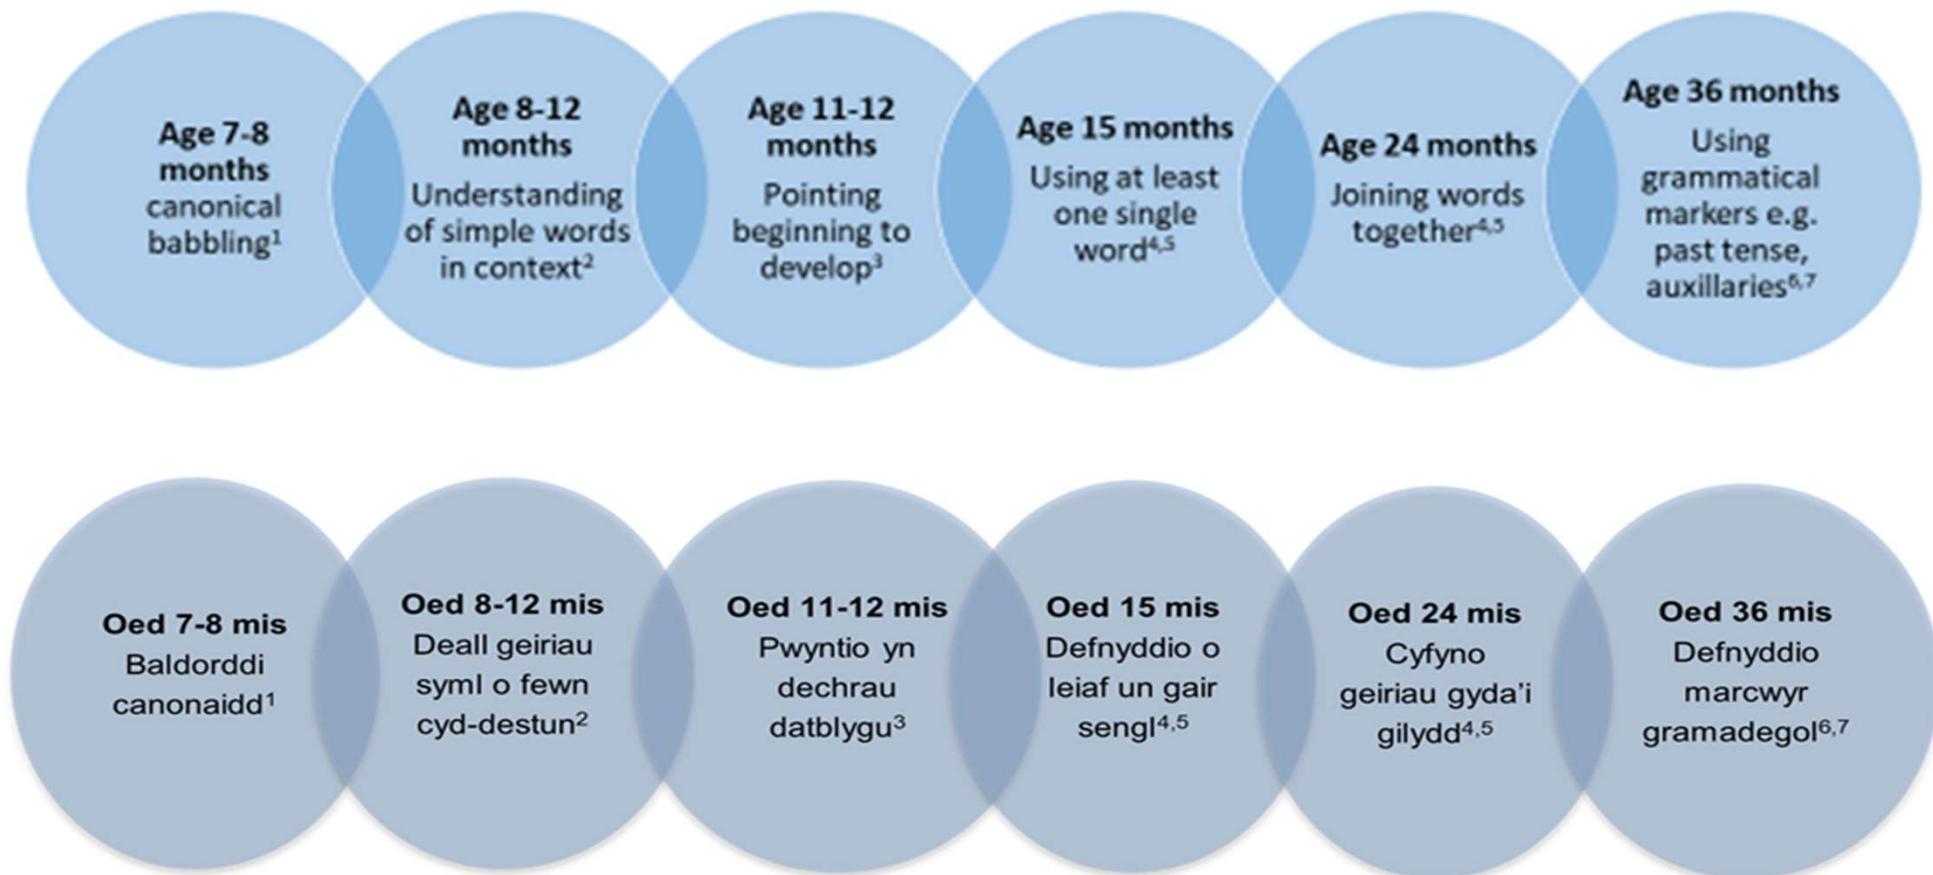

- Ffatorau risg ac amddiffynnol
- Sgiliau penodol - adnabod pryderon parhaus possibl
- Defnyddir datblygiad arferol fel canllaw

Protocols for screening early language development / Protocolau sgrini o datblygiad iaith gynnar

Summary of milestones in early language development

Key: ¹Morgan & Wren (2018); ²Sheridan, Sharma & Cockeril (2014); ³Colonessi et al. (2010); ⁴Dale et al. (1989); ⁵Mayor & Plunkett (2010); ⁶Hadley & Holt (2006); ⁷Hadley & Short (2005).

Protocols for screening early language development / Protocolau sgrinio datblyg iad iaith gynnar

When?

- Development is influenced by:
 - Biological and genetic factors
 - Range of experiences and interactions
 - How others interact with them
- Monitoring may be better than one-off screening
- Healthy Child Wales recommends surveillance at:

15 months / mis

27 months / mis

Pryd?

- Mae datblygiad yn cael ei ddylanwadu gan:
 - Ffatorau biolegol a genetig
 - Ystod o brofiadau a rhyngweithiadau
 - Sut mae eraill yn rhyngweithio â nhw
- Gall monitro fod yn well na sgrinio untro
- Mae Plant Iach Cymru yn argymhell gwyliadwriaeth am:

Protocols for screening early language development / Protocolau sgrinio datblygiad iaith gynnar

Summary of key knowledge relevant to screening for early language difficulties

12 months

Parental report of communication skills combined with knowledge of risk factors can identify language difficulties¹

18 months

Expressive vocabulary alone not sufficient to predict later language outcome²

2 years

Parent-led Intervention for language delay effective at this age^{3,4}

12 mis

Anawsterau iaith yn cael eu hadnobod drwy adroddiad rhieni o'r sgiliau cyfathrebu yn gysylltiedig â gwybodaeth am

18 mis

Geirfa mynegiannol yn unig ddim yn ddigonol i ragfynegi canlyniad iaith diweddarach²

2 mlwydd

Ymyrraeth ar gyfer oediad iaith wedi ei arwain gan riant yn effeithiol ar gyfer yr oed hwn^{3,4}

Key: ¹McKean et al (2016); ²Wake et al (2011); ³Buschmann et al (2009); ⁴Girolametto et al (1995); ⁵Miniscalco, Westerlund & Lohmander (2005); ⁶Ghassabien et al (2014); ⁷Law et al (2012); ⁸McKean et al (2017)

Protocols for screening early language development / Protocolau sgrinio datblygiad iaith gynnar

Summary of key knowledge relevant to screening for early language difficulties

Crynodeb o'r wybodaeth allweddol sy'n berthnasol i sgrinio ar gyfer anawsterau iaith cynnar

2 years 6 months

Language difficulties identified at this age likely to persist at age six if not supported^{5,6}

3 years

Can accurately identify children who are not at risk of language delay⁷

4 years

Effects of early life experiences and interactions have 'played out'⁸

2 mlwydd 6 mis

Anawsterau iaith wedi ei hadnabod mewn plant yr oed hwn yn debygol o barhau yn oed 6 os na chânt eu cefnogi^{5,6}

3 mlwydd

Gallu adnabod yn gywir plant nad ydynt gyda risg o oediad iaith⁷

4 mlwydd

Effeithiau profiadau bywyd cynnar a rhngweithiadau ddim bellach yn bresennol⁸

Key: ¹McKean et al (2016); ²Wake et al (2011); ³Buschmann et al (2009); ⁴Girolametto et al (1995); ⁵Miniscalco, Westerlund & Lohmander (2005); ⁶Ghassabien et al (2014); ⁷Law et al (2012); ⁸McKean et al (2017)

Protocols for screening early language development / Protocolau sgrinio datblygiad iaith gynnar

Who?

Pwy?

Parental report /

Collaborative approach
recommended /
Argymhellwyd dull
cydweithredol

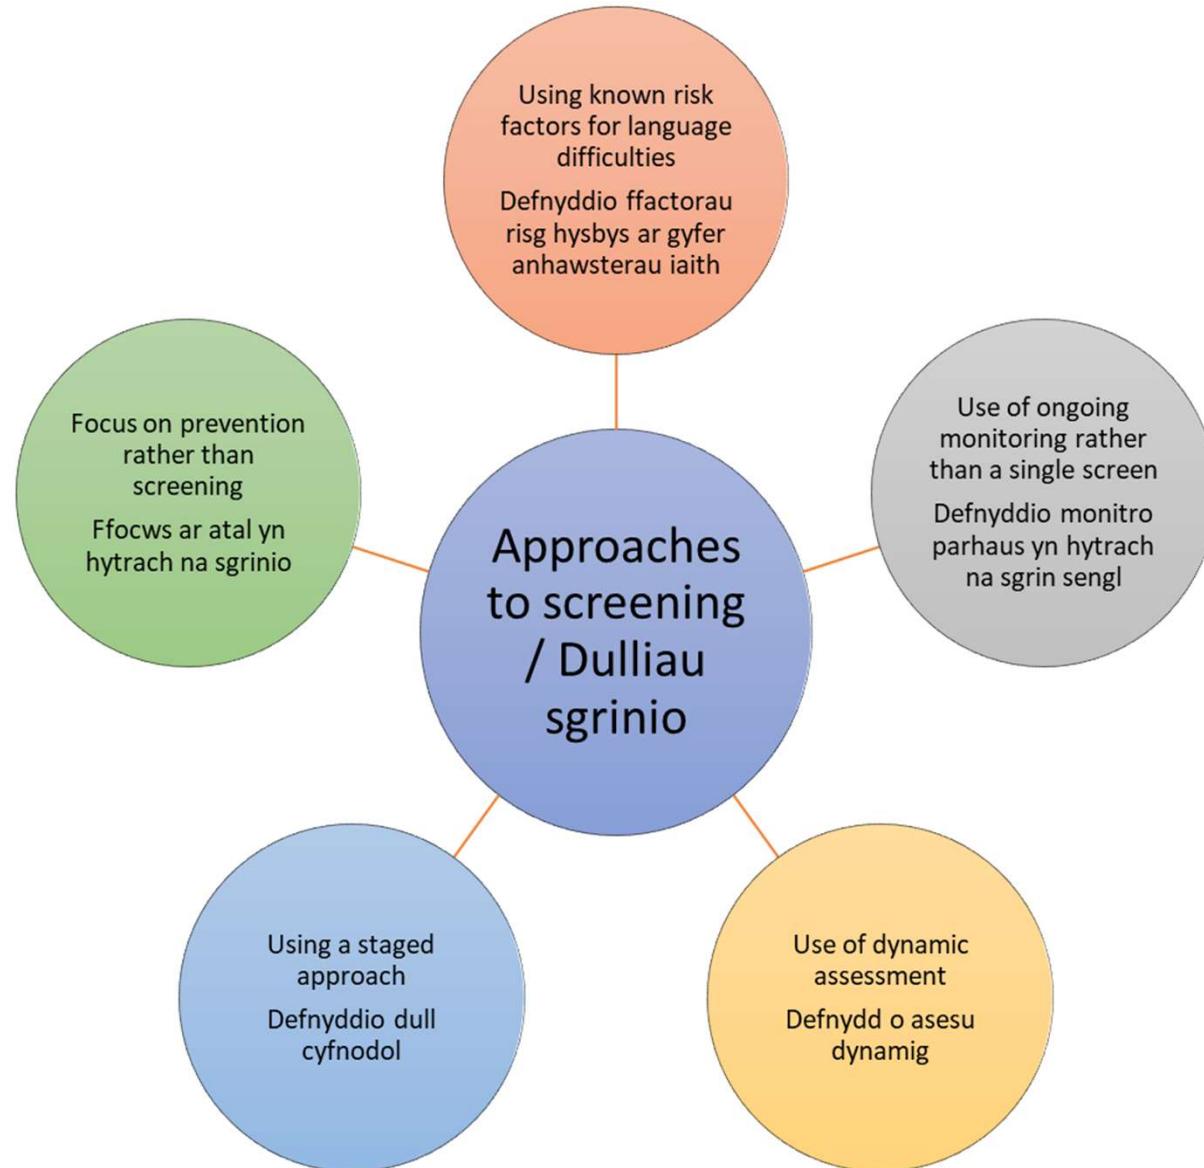

Observe / Arsylwi

Prompting and
Encouraging /
Promptio ac Annog

Protocols for screening early language development / Protocolau sgrinio datblyg iad iaith gynnar

Child language acquisition in Wales / Caffaeliad iaith plant yng Nghymru

- Presence of two official languages – Welsh and English
- 19% of people aged 3 and over able to speak Welsh in Wales (Census, 2011)
- Fluctuation in speaker numbers across different parts of Wales and individual communities
- Differences in levels of exposure

- Presenoldeb dwy iaith sw yddogol – Cymraeg a Saesneg
- 19% o fobl dros 3 mlwydd oed yn gallu siarad Cymraeg (Censws, 2011)
- Nifer o siaradwyr yn amrywio dros gwahanol rhannau o Gymru a chymunedau unigol
- Gwahanol lefelau amlygiad

Child language acquisition in Wales / Caffaeliad iaith plant yng Nghymru

- Additional languages also present in the homes and communities of many children - including BSL
- Various patterns of language within the home, education and in the community
- Speech, language and communication development is different for bi- and multilingual children – bi-directional influence

Monolingual, or ability to understand and use 1 language

Uniaith, neu gallu i ddeall a defnyddio 2 iaith

Predominantly able to understand and use 1 language

Gallu deall a defnyddio un iaith yn bennaf

Bilingual, or ability to understand and use 2 languages

Dwyieithog, neu gallu deall a defnyddio 2 iaith

- Mae ieithoedd ychwanegol hefyd yn bresennol yng nghartrefi a chymunedau llawer o blant - gan gynnwys BSL
- Patrymau iaith amrywiol o fewn y cartref, addysg ac yn y gymuned
- Mae datblygiad lleferydd, iaith a chyfathrebu yn wahanol ar gyfer plant dwyieithog ac amlieithog – dylanwad deugyfeiriadol

Monolingual and bilingual considerations / Ystyriaethau uniaith a dwyieithog

Nature of language exposure –
Simultaneous vs Sequential

Natur amlygiad iaith –
Cydamserol neu Dilynianol

Frequency of exposure

Amllder amlygiad iaith

**Factors that influence
language development
for bilingual children**

**Ffactorau sy'n
dylanwadu ar
datblygiad iaith mewn
plant dwyieithog**

Timing of language exposure - Age of onset
of each language

Amseriad amlygiad iaith - Oed dechreuad y
ddwy iaith

Status and use of each language -
education and society as a whole

Statws a defnydd y ddwy iaith –
o fewn addysg a'r gymdeithas gyfan

Monolingual and bilingual considerations / Ystyriaethau uniaith a dwyieithog

- Same proportion of monolingual and bilingual children with SLC difficulties
- Bilingual children can be under- and over-represented on SLT caseloads
- Screening practices appropriate for both populations— efficient distribution of funding and resources
- Yr un gyfran o blant uniaith a dwyieithog ag anawsterau lleferydd, iaith a chyfathrebu
- Gall plant dwyieithog gael eu tangynrychioli a'u gorgynrychioli ar Iwythi achosion ThlaLI
- Arferion sgrinio sy'n briodol ar gyfer y ddau boblogaeth-dosbarthu cyllid ac adnoddau'n effeithlon

Screening in Wales / Sgrinio yng Nghymru

Screening tools in
Wales need to
accommodate 3
distinct populations:

children who are exposed predominantly to English

plant sy'n cael amlygiad i Saesneg yn bennaf

children who are exposed to both Welsh and English – some experiencing predominantly exposure to Welsh in the early years

Plant sy'n cael amlygiad i Cymraeg a Saesneg – rhai yn profi amlygiad i'r Gymraeg yn bennaf yn y blynnyddoedd cynnar

children who are exposed to multiple languages which include English and may include Welsh

Plant sy'n cael amlygiad i ieithoedd lluosol sy'n cynnwys Saesneg a gallai cynnwys Cymraeg

Mae angen i offerynau sgrinio yng Nghymru fod yn addas ar gyfer 3 poblogaeth gwahanol:

What makes an effective surveillance tool? /

Beth sy'n gwneud offeryn gwyliadwraeth effeithiol?

Sam Harding
BSLTRU

What makes an effective surveillance tool? Beth sy'n gwneud offeryn gwyliadwriaeth effeithiol?

- Impact
 - Tool's objectives match the objectives of the service provider
- Acceptability
 - The tool is believed by the service user and the service provider to be measuring the 'right' thing
- Effaith
 - Amcanion yr offeryn yn cyd-fynd ag amcanion y darparwr gwasanaeth
- Derbynioldeb
 - Mae'r defnyddiwr gwasanaeth a darparwr y gwasanaeth yn credu bod yr offeryn yn mesur y peth 'cywir'

What makes an effective surveillance tool? Aeth sy'n gwneud offeryn gwyliadwriaeth effeithiol?

- Cost
 - Resources limitations are universal. Can the service afford to buy the tool?
- Cost
 - Mae cyfngiadau adnoddau yn gyffredin i bawb. Oes modd i'r gwasanaeth brynu'r offeryn?

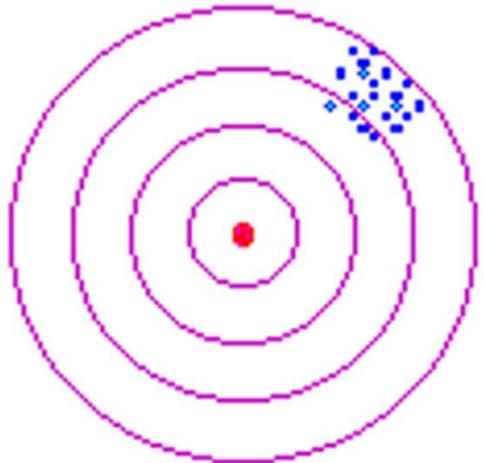

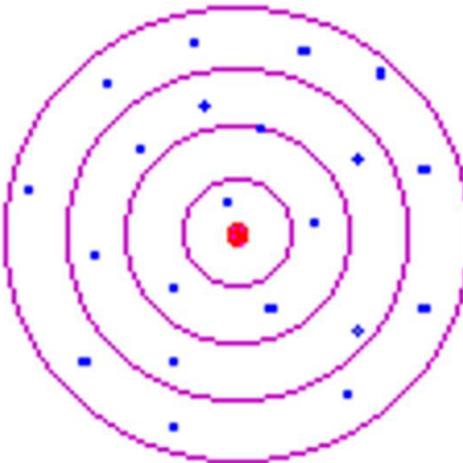

What makes an effective surveillance tool? Beth sy'n gwneud offeryn gwyliadwriaeth effeithiol?

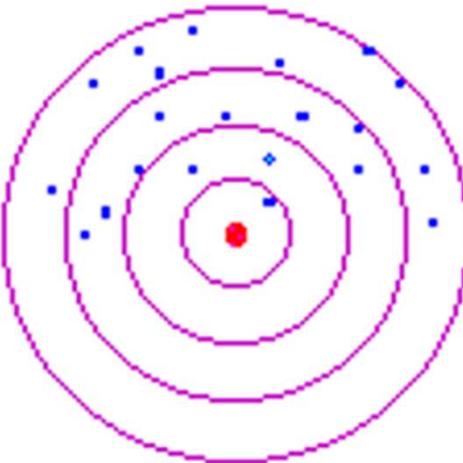

**Reliable
Not Valid**

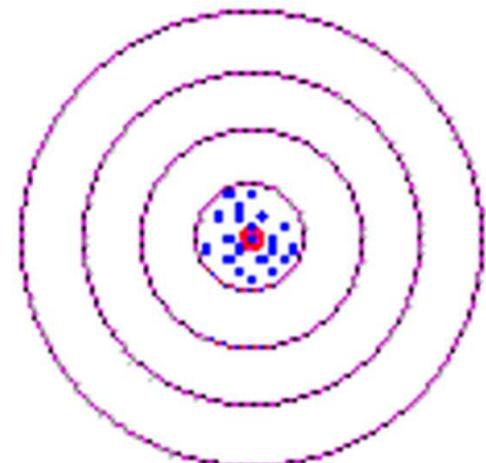

**Valid
Not Reliable**

**Neither Reliable
Nor Valid**

**Both Reliable
And Valid**

**Dilys
Dim yn Ddibynadwy**

**Dibynadwy
Dim yn ddilys**

**Dim yn Ddibynadwy
nac yn Ddilys**

**Dibynadwy a
Dilys**

What makes an effective surveillance tool? Beth sy'n gwneud offeryn gwyliadwriaeth effeithiol?

- Content-related
 - Appropriate content
- Face validity
 - Does the test appear to test what it aims to?
- Construct validity
 - Does the test relate to the underlying theoretical concepts?
- Cysylltiedig â chynnwys
 - Cynnwys priodol
- Dilysrwydd gwynebol
 - A yw'n ymddangos bod y prawf yn profi'r hyn y mae'n anelu ato?
- Dilysrwydd damcaniaethol
 - A yw'r prawf yn ymwneud â'r cysyniadau damcaniaethol sylfaenol?

What makes an effective surveillance tool? Beth sy'n gwneud offeryn gwyliadwriaeth effeithiol?

- Criterion-related
 - Relationship to other measures
- Concurrent validity
 - Does the test relate to an existing, similar measure?
- Predictive validity
 - Does the test predict later performance on related criterion?
- Cysylltiedig â meini prawf
 - Perthynas â mesurau eraill
- Diliusrwydd cydamserol
 - A yw'r prawf yn ymwneud â mesur tebyg sy'n bodoli eisoes?
- Diliusrwydd rhagfynegol
 - A yw'r prawf yn rhagweld perfformiad diweddarach ar faen prawf cysylltiedig?

Sensitivity & Specificity / Sensitifrwydd a Phenodoldeb

		DISEASE		
		Disease	No disease	
TEST not always perfect	+	True positive (TP)	✗ False positive (FP)	more testing treatment
	-	✗ False negative (FN)	✓ True negative (TN)	psychological effects Cost Risk
		↓ delays in diagnosis and treatment false sense of security risky behaviour legal consequences		

SENSITIVITY = $\frac{TP}{TP+FN}$

SPECIFICITY = $\frac{TN}{FP+TN}$

- Sensitivity & Specificity / – Worked example
- Sensitfrwydd a Phenodoldeb – Enghraift

What makes an effective surveillance tool? Beth sy'n gwneud offeryn gwyliadwriaeth effeithiol?

- Recommended thresholds
 - Reliability (internal consistency) = 0.6-0.7
 - Construct Validity = 0.8
 - Sensitivity = 0.8
 - Specificity = 0.8
- Trothwyon a argymhellir
 - Dibynadwyedd (cysondeb mewnol) = 0.6-0.7
 - Dilysrwydd damcaniaethol = 0.8
 - Sensitifrwydd = 0.8
 - Penodoldeb = 0.8

Pa mor ddefnyddiol ydyn
nhw ar gyfer y cyd-destun
Cymreig?

Scoping review findings / Canfyddiadau'r adolygiad cwmpasu

Bilingualism review

Aim 1: To identify tools that may be appropriate for use in the Welsh-English context

16 studies

2 additional tools – appropriate for inclusion given their availability for use with Welsh speakers

Adolygiad dwyieithrwydd

Nod 1: I adnabod offer a allai fod yn briodol i'w defnyddio yn y cyd-destun Cymraeg-Saesneg

16 astudiaeth

2 offeryn ychwanegol – priodol i'w cynnwys o ystyried eu bod ar gael i'w defnyddio gyda siaradwyr Cymraeg

Scoping review findings / Canfyddiadau'r adolygiad cwmpasu

Bilingualism review

Aim 2: To consider which factors are important in adapting screening practices for bilingual and Welsh-speaking context

- Language background and exposure
- Standardisation
- Screening in both languages
- Scoring
- Listening to parents

Adolygiad dwyieithrwydd

Nod 2: Ystyried pa ffactorau sy'n bwysig wrth addasu arferion sgrinio ar gyfer cyddestun dwyieithog a Chymraeg

- Cefndir ac amlygiad iaith
- Safoni
- Sgrinio yn y ddwy iaith
- Sgorio
- Gwrando ar rieni

Conclusions and recommendations

Casgliadau ac argymhellion

Yvonne Wren
BSLTRU/CMU

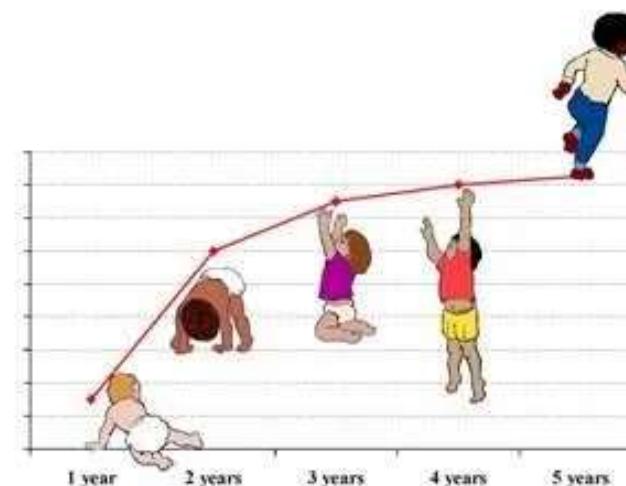

Recommendation 1 / Argymhelliaid 1

Should screening take place?

A systemic or preventative approach to screening is more beneficial than a single screen for language difficulties and should be adopted in preference to a single screen at one point in time.

A ddylai sgrinio ddigwydd?

Mae dull systemig neu ataliol o sgrinio yn fwy buddiol nag un sgrin ar gyfer anawsterau iaith a dylid ei fabwysiadu yn hytrach na sgrin sengl ar un adeg.

Recommendation 2 / Argymhelliaid 2

Should screening take place?

Key developmental communication milestones can be used in the screening of early language development.

A ddylai sgrinio ddigwydd?

Gellir defnyddio cerrig milltir cyfathrebu datblygiadol allweddol wrth sgrinio datblygiad iaith cynnar.

Recommendation 3 / Argymhelliad 3

Should screening take place?

Known risk factors should be combined with monitoring of language skills and/or dynamic assessment to enhance screening.

A ddylai sgrinio ddigwydd?

Dylid cyfuno ffactorau risg hysbys â monitro sgiliau iaith a/neu asesiad deinamig i wella sgrinio.

Recommendation 4 / Argymhelliaid 4

Should screening take place?

Parents are able to provide reliable information about their child's current level of communicative functioning from age 2 years.

A ddylai sgrinio ddigwydd?

Mae rhieni'n gallu darparu gwybodaeth ddibynadwy am lefel gweithrediad cyfathrebol presennol eu plentyn o 2 oed.

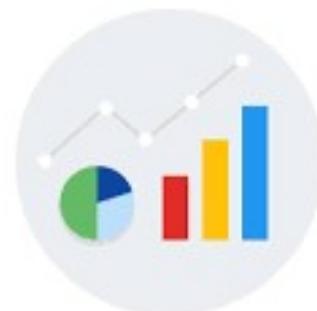

Recommendation 5/ Argymhelliaid 5

Summary of tools

Only those tools where data are available to make a judgement regarding their robustness should be used.

Crynodeb o offerynnau

Dim ond yr offerynnau hynny lle mae data ar gael i wneud dyfarniad ynghylch eu cadernid y dylid eu defnyddio.

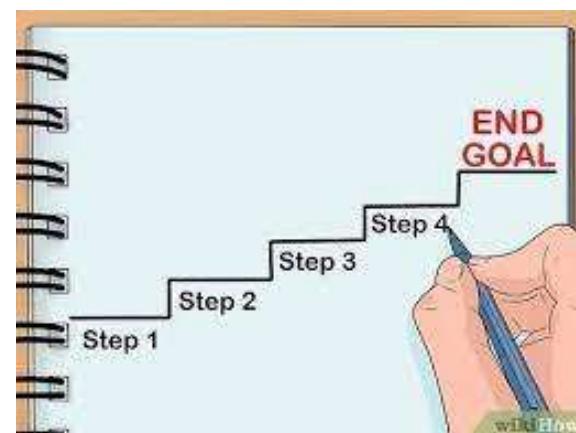

Recommendation 6 / Argymhelliad 6

Summary of tools

Where these data are not available, it is possible to make a plan to acquire the evidence needed to determine suitability.

Crynodeb o offerynnau

Lle nad yw'r data hyn ar gael, mae'n bosibl gwneud cynllun i gael y dystiolaeth sydd ei hangen i bennu addasrwydd

Recommendation 7 / Argymhelliaid 7

Summary of tools

While no one tool is currently suitable for use across the age range, consideration should be given to whether there is value in developing such a tool.

Crynodeb o offerynnau

Er nad oes un offeryn unigol ar hyn o bryd yn addas i'w ddefnyddio ar draws yr ystod oedran, dylid ystyried a oes gwerth mewn datblygu offeryn o'r fath.

Recommendation 8 / Argymhelliad 8

What makes an effective screening tool?

Screening tools should be evaluated based on their validity, reliability, impact, acceptability, cost and diagnostic power.

Beth sy'n gwneud offeryn sgrinio effeithiol?

Dylid gwerthuso offer sgrinio ar sail eu diliusrwydd, dibynadwyedd, effaith, derbynioldeb, cost a phŵer diagnostig.

Recommendation 9 / Argymhelliaid 9

Important components

Information about children's language background and exposure to each of their languages should be collected as this is crucial to the screening process for bilingual children.

Cydrannau pwysig

Dylid casglu gwybodaeth am gefndir ieithyddol plant a'u hamlygiad i bob un o'u hieithoedd gan fod hyn yn hollbwysig i'r broses sgrinio ar gyfer plant dwyieithog.

Recommendation 10 /Argymhelliad 1

Important components

Bilingual and multilingual children should be assessed in all of their languages in order to obtain an accurate picture of their language development.

Cydrannau pwysig

Dylid asesu plant dwyieithog ac amlieithog ym mhob un o'u hieithoedd er mwyn cael darlun cywir o'u datblygiad iaith.

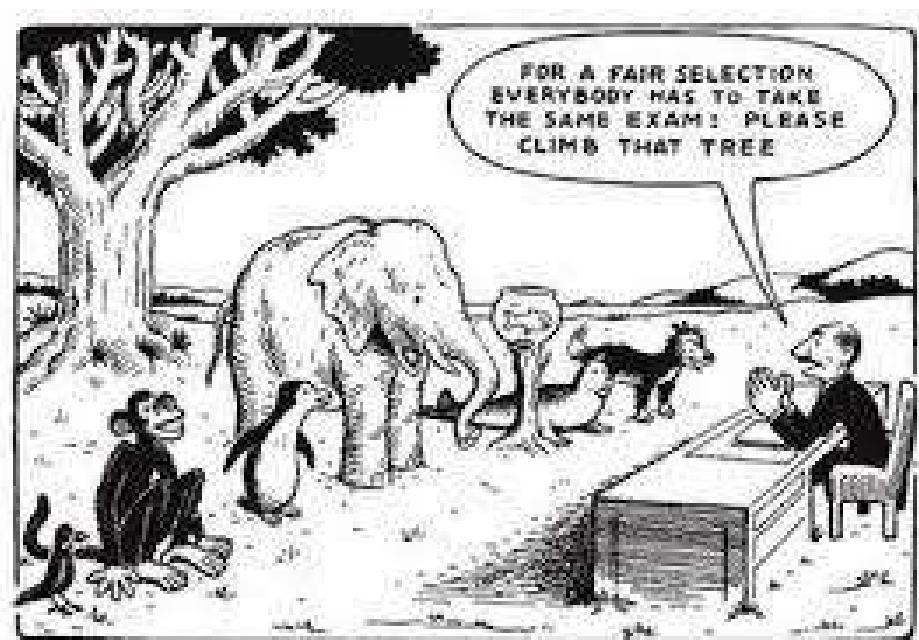

Recommendation 11 / Argymhelliad 11

Important components

The use of standardised assessments with bilingual and multilingual children should be considered with care.

Cydrannau pwysig

Dylid ystyried yn ofalus y defnydd o asesiadau safonol gyda phlant dwyieithog ac amlieithog.

Recommendation 12 / Argymhelliad

Important components

Normative data for monolingual children should not be used as a comparison for bilingual children's language development.

Cydrannau pwysig

Ni ddylid defnyddio data normadol ar gyfer plant uniaith fel cymhariaeth ar gyfer datblygiad iaith plant dwyieithog.

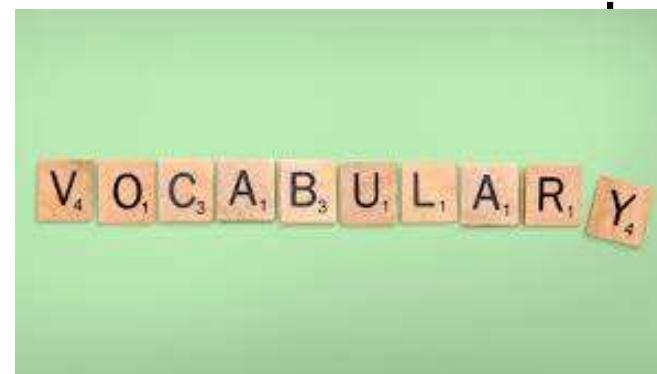

Recommendation 13 / Argymhelliad

Important components

Measurements of vocabulary in bilingual and multilingual children should not be used as they may fail to accurately represent their competence in either language.

Cydrannau pwysig

Ni ddylid defnyddio mesuriadau geirfa mewn plant dwyieithog ac amlieithog oherwydd efallai na fyddant yn cynrychioli eu gallu yn y naill iaith na'r llall.

Recommendation 14 / Argymhelliaid

Important components

Parents should be consulted about their child's speech and language development (in all languages where applicable) and any concerns they may have should be discussed.

Cydrannau pwysig

Dylid ymgynghori â rhieni ynghylch datblygiad iaith a lleferydd eu plentyn (ym mhob iaith lle bo'n berthnasol) a dylid trafod unrhyw bryderon sydd ganddynt.

Summary / Crynodeb

- Review -novel and built on existing work
- Risk and protective factors identified
- Adolygiad -newydd ac wedi adeiladu ar waith presennol
- Nodwyd ffactorau risg ac amddiffynnol

Summary / Crynodeb

Evidence shows:

- Screening more dependable from 2;6
- Parents = good source
- Needs change over time
- One-off screen may miss indicators

Mae tystiolaeth yn dangos:

- Sgrinio yn fwy dibynadwy o 2;6
- Rhieni = ffynhonnell dda
- Angen newid dros amser
- Efallai y bydd sgrin unwaith ac am byth yn methu dangosyddion

Summary / Crynodeb

107 tools for English
16 tools for bilingual
8 for Welsh

Only 10 fulfilled
criteria for inclusion

No one tool sufficient

107 offer ar gyfer Saesneg
16 offer dwyieithog
8 ar gyfer y Gymraeg

Dim ond 10 oedd yn
bodloni meini prawf ar
gyfer cynhwysiant

Nid oes un offeryn digonol

Summary / Crynodeb

Recommendations provide key principles

Mae argymhellion yn darparu egwyddorion allweddol

Some common with England

Rhai yn gyffredin â Lloegr

Some novel to Wales

Rhai newydd i Gymru

Summary/ Crynodeb

Need robust
programme for
surveillance:

- Feasible
- Cost effective
- Acceptable

Identify children in
need.

Angen rhaglen
gadarn ar gyfer
sgrinio:

- Dichonadwy
- Cost effeithiol
- Derbyniol

Adnabod plant mewn
angen.
